Communications

 iLifestyle

Quality Design

Filled with thermal emission oil and containing an electric element, ensuring quick heat up time and even temperature.

Manufactured with aluminium fins to ensure effective heat transmission through a combination of radiant and convectional heat transfer.

LCD TFT screen and touch controls

The iLifestyle boasts a large, easy to read LCD TFT display screen and touch sensitive controls for clarity and ease of use.

Three operating modes to choose from:

- Eco
- Comfort
- Frost

Temperature Control Technology

Use less energy & save money

Our advanced **PID Intelligent Control** technology ensures that the ATC iLifestyle is energy efficient, with accuracy to 0.2 °C.

Conserve energy

Thanks to its **Open Window Technology** the iLifestyle can automatically detect a fall in temperature caused by open windows, and suspends any programmed heating to prevent wasting energy.

Wake up to a warm room

Using the **Adaptive Start Feature**, you can program the iLifestyle to turn on and heat certain rooms at certain times, to suit your schedule. Simply program your desired temperature, and the iLifestyle will calculate the required time needed to reach that temperature.

Product and Technical Details

Product Features

- Smart controllability via app
- Simple to program and operate
- Easy to read TFT LCD screen
- 3 operating modes: Eco, Comfort, Frost (CR2032) Battery Backup for program and time
- Improved Energy Efficiency: Adaptive Start Feature – Open Window Technology – PID Intelligent Control accurate to 0.2°C
- Universal wall brackets for quick installation – locks bottom of radiator
- Elements joined by unique patented silicon joints for longer life
- Filled with high quality thermal emission oil – quick heat up time

Approvals

- Complies: EN 60335-1, EN 60335-2-30
