

# RF Gateway

Enabling Remote Control of the RF Heating Range from your Connected Device

## Key Features Include:

- Each Gateway allows the secure connection of up to 30 heaters\*
- Control programmed heaters individually, or in groups
- Control heaters on-the-go via the ATC Tevolve app
- The ATC Tevolve app is available to download from Google Play and Apple App Stores
- Monitor individual heater power consumption and room temperature for the last day, week, month or year within the app
- Monitor whole home consumption with the RF Power Monitor
- Gateway comes complete with 3-pin UK USB adaptor and 45cm RJ45 connection cable

\*Connectivity depends on site location, internet availability and building construction

Part of the ATC Smart RF Family, the RF Gateway enables connections between the Sun Ray RF, Merida RF, Neptune RF, and Pacific RF Towel Radiators. It also connects to the Nexum Underfloor Heating Thermostat, and the RF Power Monitor. The Gateway works in conjunction with the internet router, to enable on-the-go control via the ATC T evolve app.
